Education

Ladoke Akintola university of technology

Oct 2024 – Oct 2029 B.Sc. Cyber security

Work Experience

BuggyBillions

Intern (Full Stack Developer) | Oyo, Nigeria

April 2024 – Present

- Led student groups in learning full stack web development, teaching both frontend and backend technologies, including PHP, JavaScript, and frameworks like React.
- Built and managed projects with students, focusing on creating real-world applications, handling both frontend design and backend functionality.
- Gained skills in project management, leadership, and multitasking by guiding students through the development process, while ensuring timely completion of assignments.

Sunmence

Intern (Frontend Developer) | Oyo, Nigeria

May 2024 – Present

- Developed and maintained responsive web applications using modern frontend technologies, collaborating with cross-functional teams to deliver client projects on time.
- Led frontend implementation for multiple client websites, ensuring high-quality code standards and optimal user experience while meeting specific client requirements.
- Contributed to full-stack development by assisting with backend tasks, demonstrating versatility and expanding technical skillset beyond frontend responsibilities.

Educational Website ([Universe-University](#))

Frontend Developer | Oyo Nigeria | Remote

Oct 2023 – Aug 2024

- **Overview:** In this experience, I worked on developing an informative educational platform for a university, focusing on user experience with a visually appealing interface.
- **Skills Used:** I utilized a combination of web technologies, including BootStrap for mobile responsiveness, ensuring smooth interaction across different screen views and sizes. My frontend work included developing a sleek, user-friendly interface that enhanced overall user interaction.

Skills & Languages

Languages: JavaScript, HTML, CSS.

Frameworks/Libraries: BootStrap.

Developer Tools: Git, GitHub.

Projects

Petal Power

- Architected and developed a full-featured e-commerce website for plants and gardening accessories, integrating secure payment gateway for seamless transactions utilizing modern technologies and frameworks.

Mediconnect

- A simple landing page designed to help users connect with a doctor online. It contains detailed description of the available services and pricing.

Pineleaf Estates

- Built a professional website for a land-banking and investment company, implementing a modern, trust-building design that enhances client engagement while effectively showcasing their property portfolio and investment opportunities.

Dynamic Weather App

- A sleek weather forecasting app providing users with real-time data based on their location. The app allows users to search for weather conditions in various cities.
